## Ultrasonic cleaning tanks

CLEANING TECHNOLOGY

### **SONOWAVE cleaning tanks**

with external generators are specifically designed for the high demands made during industrial use.

- **Cleaning tank made of 2 mm stainless steel 1.4571**  
**Base of the tank made of 3 mm stainless steel 1.4571**  
**Casing made of 1.5 mm stainless steel 1.4301**
- **Ultrasonic generator with all features of the SONIC DIGITAL generator series**
- **Heating with digital temperature control up to 80°C and digital display**
- **Digital time setting and display**
- **Standard frequencies: 25, 30, 40 and 80 to 150 kHz**
- **Multi-frequency cleaning tank**

### Construction

The outstanding features of the cleaning tanks made entirely of stainless steel are an extremely robust construction, high reliability and long service life. Effective heat and sound insulation reduces both energy consumption and noise emissions. The base of the tank is tapered slightly toward the drain. This allows the tank to be emptied fully by the stainless steel tap. Adjustable feet up to 80 mm help ensure that the unit sits perfectly level and securely.

### Operational reliability

All operator elements and the digital display are located on the external ultrasonic generator. This offers reliable protection for the electronics from moisture. Ergonomically sound control of the heating with the functions "on/off, temperature and time control" from the workplace. The heating has a safeguard to prevent dry running.

### SONIC DIGITAL series ultrasonic generators

The SONIC DIGITAL series ultrasonic generators developed by Weber Ultrasonics ensures constant power output, even with changing conditions in the tank. Protection from short-circuit, overload, overheating and dry running comes as standard.

SONOWAVE ultrasonic cleaning tank 100l
